09:00 - 11:30 am CET (VALENCIA, SPAIN)

EAAE-ARCC International Conference - Workshop

Defining the role of Architecture in the Circular Economy Paradigm

This panel session / workshop is intended to formulate a new research agenda that is focused on the role of architecture in the Circular Economy paradigm shift, and further identify the knowledge gaps for scholars, designers, academics, and architects for research, teaching, and scholarship collaborative opportunities.

[panel discussion] 09.00-10.00

- The panel session will start by an introduction to the topic and panelists biographies.
- Brief presentation by panelists followed by panelists/moderator conversation.
- Participants Q&A.

[workshop] 10.15-11:30

- Panelists will lead the subgroup discussions in identifying potential Circular Economy research questions in 4-5 areas.
- The workshop will discuss potential collaboration between researchers, academics, and the industry.
- Discuss planning for future call for papers, conferences and meetings to expand the topic.

The sessions will take place online via the **Teams platform** of the conference (link to be provided). The workshop is open to all interested. Please, contact the organizer for further details. No previous registration is required.

Workshop organizer: **Dr. Ahmed K. Ali, Texas A&M University**
